

Entry Level Positions Available!

Founded in 1928, Mass. Electric Construction Company (MEC) excels as one of the leading electrical construction contractors in the country. MEC has specialized in complex and large-scale electrical projects for nearly 80 years, from the installation of turbines at the Panama Canal in the 1940's to the latest Ethanol Power Plants in Aurora, Nebraska and electrical work at the recently constructed Boston Convention & Exhibition Center. Mass Electric recently divided into two separate districts, MEC Industrial and MEC Transportation, in order to focus on their respective markets.

Position Title:

Entry Level Engineer/Estimator

Description:

Our entry level position provides support for electrical construction operations. During the first few years at Mass. Electric you might expect to spend time in positions involving field engineering, cost engineering, estimating and engineering support. Duties may include, but are not limited to: tracking of installed quantities, forecasting future quantities, takeoffs and estimating assignments, creation of as-built drawings using AutoCAD and material submittals.

Requirements:

- Undergraduate or graduate degree in Construction Management, Construction or Electrical Engineering, Engineering Technology or related engineering fields
- **Must be willing to travel and relocate**
- **Candidate must be able to work in the United States without sponsorship by MEC, both now and in the future**

Start:

Upon Graduation
